

# I'm George.

a passionate IT Student.

## Hello.

I am a passionate IT Student. I am ambitious, persevering and eager to continuously learn. Looking forward for any challenging opportunities that may come.

## My Skills.

### Programming and Web Development

I started learning to program and code when I was 17 years old, after seeing a tutorial on Youtube. Since then I have dedicated as much time as possible into developing my tech

skills.

### Teamwork

What I have learnt in my school years is that teamwork is everything, no matter what domain of work you are pursuing, which is why I prefer doing everything in a team.

## Get In Touch

If you love technology as much as I do

If you are as passionate as I am, let's connect and change the world together!
